

MODULES DESCRIPTION

Project contains 4 modules:

1. User
2. Admin
3. Delivery
4. Donor

USER: The home page will have public user interface which includes HOME, ABOUT US, LOGIN, PRODUCTS, DONOR AND CONTACT US. This page will have an option for the user to login. User can login by using his/her username & contact number. A window will be displayed with the street numbers & available products with its prices. The information about the website will be displayed in the ABOUT section. Home page contain login section for admin, delivery boy and customers. The CONTACT US section contains the contact details of our firm. User can login with their user name and password and it will go next page. It shows welcome. In that page include HOME, ORDER, HISTROY and LOGOUT. And the customer can view their previous order and new order also include in that section.

Delivery: When the staffs deliver the order, a popup message sends to the admin. And the deliver section include order report and can mark they delivered or not that can view by admin.

Admin:

In admin section he is the total controller of the whole firm. He can manage both the customer page & deliver section. In his system he get the total view of whole network system. The main process that occurred in admin section is BILLING. The billing & further process is done by the admin. And the admin section include home of admin, staff, add product, salary, reports, and logout. In report section it display the reports of add product, staff and salary. Admin can view the donor details.

Donor:

He or she can sell their item with amount through a form .
